

Infrastructure Project Coordination

Envista is an easy-to-use, map-based solution by which utilities, municipalities, and highway agencies share construction and maintenance project information. For the first time, there is a convenient, centralized way to exchange planning information with *all stakeholders simultaneously* to significantly save time, reduce costs, and improve operations.

Exchange. Simultaneous exchange of project plans with utilities, municipalities, and highway agencies

- Centralized, web-based software service
- Automatic loading from spreadsheets and GIS
- Immediate availability of up-to-date project plans

Visualize. Intuitive, map-driven view of maintenance and construction projects

- Pan and zoom geospatial views on maps
- Map view synchronized with familiar spreadsheet view of projects
- Easy-to-use project viewing and filtering tools (by project owner, by geography, by time)

Identify. Instant visibility of project coordination issues

- Conflicts automatically highlighted on a map
- View street cut moratoriums and “opportunity” streets where joint work can be planned
- Personalized management dashboard summarizing critical planning information

Resolve. Collaboration tools to resolve project issues and improve project planning

- Stakeholders share the same holistic, real-time view of all project plans
- Instant availability of contact information
- Automatically notify project owners of key issues
