## Compass Program Newsletter

June 2008

### San Francisco Joins Compass Program

The City and County of San Francisco is the latest — and largest — municipality to join the Envista Compass Program. According to Dan McKenna, Deputy Bureau Manager for the San Francisco Department of Public Works, “In the past several years, we’ve made great progress in coordinating our project schedules with those of utility companies. Now with Envista, we’re eager to go to the next level. Envista’s map-driven technology for infrastructure coordination online looks very promising.” McKenna continues, “Increased coordination and timely information help us provide quality services to our customers. We are looking forward to working with Envista to find new ways we can improve our business practices to better serve the residents of San Francisco.” Welcome San Francisco, our first West Coast city!

Thanks to you, the Compass Program is pointing the way for greater collaboration between municipalities and utilities.

### Meet Chris Ciriello, Application Engineer

Many of you know Chris Ciriello as an important contact for the Compass Program. Chris assists members as they get started adding their project data to Envista and fielding their questions.

If you haven’t yet had a chance to add your project schedule information to Envista, now is a good time to contact us for the help you need to get started. In addition to Chris, our Support Department is ready to answer your questions at (978) 232-6350 or [support@envista.com](mailto:support@envista.com).

### Compass Meeting

The most recent Compass Program meeting for Massachusetts was held June 17<sup>th</sup> at Max Stein’s Restaurant in Lexington, MA. Attendees from 8 towns — including Arlington, Beverly, Danvers, Lexington, Needham, Newton, Waltham, Weymouth — learned about the latest developments in Envista’s solution for infrastructure coordination online and offered their feedback on new features.
